

## Text Aloud

This is a software program that utilizes a voice to read text. It is the perfect application for those hard to comprehend psychology, sociology and science journals. It is also a perfect tool for reading back your papers to edit for clarity.

Getting started (two methods)

1. Use an Internet browser and the TextAloud toolbar options using the View menu

The toolbar below will appear:

OR

2. Go to the **Start** button  
Go to **Programs/Text Aloud**  
Click on the icon  to open the program

This software is loaded on every computer lab computer, the writing center, and at Meadowood and Redfield.
