

IPAD WIRELESS NETWORK SETTINGS

1. Turn on Airplane mode (go to Settings, then slide the Airplane Mode setting from Off to On).

2. Go to Settings.

3. Select WiFi.

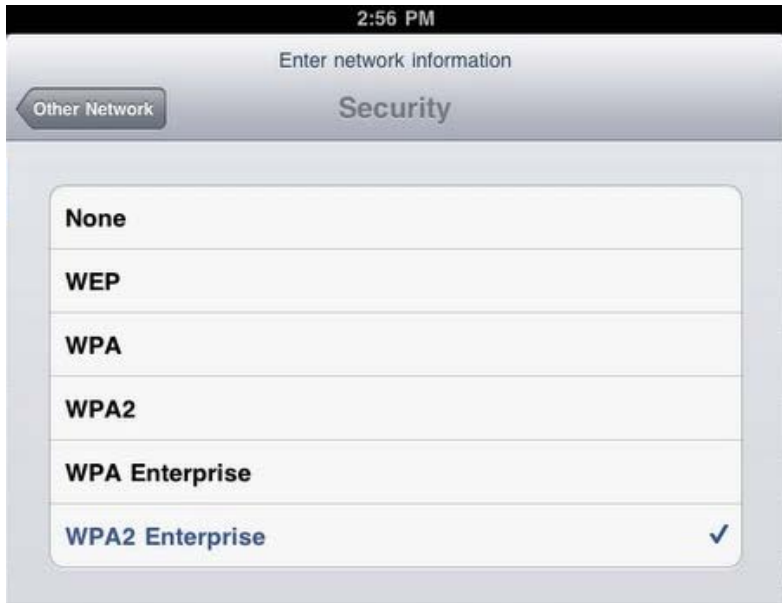

4. Tap Other...

5. Type in the respective wireless network that you have access to (case-sensitive):
 - a. For faculty and staff: TMCC-Admin
 - b. For students: TMCC-Student

6. Tap Security, and select WPA2 Enterprise.

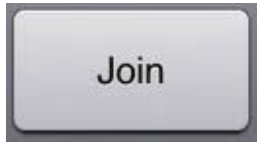

7. Tap the Other Network arrow button.

8. Enter your TMCC network username and password into the proper fields.

9. Select the Join button on your keyboard.

Note:

10. You may get a DR-VACADIAS.tmccadmnm.tmcc.edu Certificate window. Tab the **Accept** button to continue.
11. If you get an "unable to join the network" popup, you may **dismiss** this.
12. Now you should see the TMCC-Admin network in your WiFi networks list.
13. You may get a "Cannot Verify Server Identity" window. If you do, hit **Continue**.
14. When the Network Verification page comes up, you may exit out of this, and now your iPad should successfully be connected to the TMCC-Admin network.

For additional questions: if you are a TMCC student, contact IT Student Support at 775-674- 7576; faculty/ staff, please contact IT Customer Service at 775-673-7800.
